

Carbon Reduction Commitment

CARBON REDUCTION COMMITMENT

Cognigy is committed to reducing our carbon footprint and contributing to a sustainable future. We pledge to minimize greenhouse gas emissions by improving energy efficiency, using renewable energy sources wherever possible, reducing waste, and supporting eco-friendly practices across our operations.

Our 2023 emissions serve as our baseline, and we will work to reduce them every year, proportionally aligned with our growth. Our total global emissions result is:

Scope 1 emissions	1.5 tC02e
Scope 2 emissions	11.5 tC02e
Scope 3 emissions	1,582 tC02e
Total	1,595 tC02e

By setting measurable goals and continuously evaluating our progress, we aim to achieve meaningful carbon reductions, aligning with global efforts to combat climate change and protect our planet for future generations.
